Know It All> Synthetic oils have a molecular structure that is much smaller than conventional oils and therefore synthetic oils must use seal swelling additives in order to stop the oil from leaking out. *True or False?*

Car Care Tip> It's a good idea to replace the brake shoe springs at the same time the brake linings are being replaced on vehicles with rear wheel drum brakes.

E-Mail question CJ (Catonsville MD): I purchased a 2006 Chrysler Van used with 19,000 miles. It runs great/ But I notice there's soot on the front wheels. The dealer replaced the pads, which they used car lot paid for (\$150). That was nice. Now I notice that most Chrysler's front wheels have black soot on them. Is there a recall? The dealer wouldn't discuss it!

Sound Byte from Comedian Richard Jr: "Thou Shalt Laugh!"
