Car Care Tip> Many people bring high-priced motor oil, instead of purchasing bulk oil from the oil change shop.

Mail Bag question: **Mark (Matt York PA)**> Just a general question about air conditioning for cars. What should the low side pressure and the high side pressure be for a R-134a system? I want to make sure I have the proper amount of refrigerant in the system. Most systems leak a little and needs topping off every now and then. Also, what should the temp be of the cooled air coming out of the ductwork? I remember if the low pressure side is 35 psi, you should get air about 60 degrees inside the car.

Commentary: American Oil

Sound Byte from the movie soundtrack: "The Magnificent Ambersons"

Motoring Musical Memory> 1950's Buick TV commercial

Nutz & Boltz Theme Closing Music
